Teen Track: Creation Seminar

The Pillars of Evolution - In this session we define “science”, and illustrate it through several experiments. In the light of true science, the four main concepts that the theory of evolution is based upon are examined and shown to be faith-based rather than science-based. The purpose of this session is not only to show that science does not support Darwinian evolutionary theory, but also to give Christians some “tools” to help them understand the issues more clearly.

The Flood - Understanding the flood (the purpose, the causes, the aftermath & the evidence) is very important to the understanding of a biblically sound creation model. This session covers all the basics about this event, and also includes a video and PowerPoint presentation on the “Hydroplate Theory”, which is the most biblically and scientifically accurate portrayal of the flood event that we have seen.

Aunt Lucy – If humans have been evolving from ape-like creatures for millions of years, there should be a substantial number of clear bones that could be used as evidence of this. What evidence is there? As it turns out, not much! In fact, the “evidence” is stunningly sparse, being limited to a few fossilized bones. However, many of these are misinterpreted and exaggerated, and some are outright fakes. This session exposes much of this.

Ancient Civilizations – This session contrasts the evolution model with the creation model from a historic standpoint through a look at what many ancient cultures were able to accomplish. It contrasts some of these civilizations to our own.

Homeschooling Through High School: Blueprint for Success - A seminar in three parts

(Part One) Building a Framework: Strategies for High School Success

You have laid the foundation; now it's time to envision the house! We will discuss goal setting, graduation requirements, an overview of high school planning, and sketching out the courses and the plan. Q&A.

(Part Two) High School Construction Tools: Coursework & Credits

In this workshop, Vicki will walk you through building on your course descriptions, choosing specific materials to meet your goals, scheduling & lesson planning, recordkeeping, and credits, grades/GPA. We'll also discuss how to document and give credit for less conventional studies, and how to incorporate life skills and independent studies into your program. Q&A.

(Part Three) "Finishing" Touches: Graduation & Beyond

Ah - graduation! Preparing for college admission and/or apprenticeship, military service, or other options: Transcripts and resumes, reading lists, essays, portfolios. Vicki will translate the acronym maze of AP courses, CLEP tests, SAT/ACT exams, the PSAT/NMSQT, and other exams. Q&A.
